EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Amendment to the Specification

In the first line please insert:

This application is a 371 of PCT/CN04/00350 filed on April 14, 2004, which claims priority benefits from China patent application numbers CN 03245260.8 filed April 18 2003 and CN 100395572.7 filed February 10, 2004.

Election/Restrictions

1. Claims 3, 4, 8, 11, 15 are directed to an allowable generic claim, therefore the previous withdrawn claims 5-7, 9-10, 12-14, 16-18 which were directed to a different Species are hereby rejoined and fully examined for patentability.

Because all claims previously withdrawn from consideration have been rejoined, **the restriction requirement as set forth in the Office action mailed on 9/7/06 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the

Art Unit: 3763

rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Drawings

2. The drawings were received on 2/14/07. These drawings are accepted.

Specification

3. The amendment to the specification (abstract) has been received on 2/14/07 and overcome the previous objection to the Specification.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was a safety syringe with a sliding casing, a syringe barrel having a needle luer skirt, two resistance rings at its rear wherein the rings are different geometrical shape, which allows for a more reliable auto-locking function with regards to the sliding casing, a spring that is sleeved on the casing of the needle luer skirt and wherein the spring causes a unique interaction between the sliding casing and the syringe barrel.

Art Unit: 3763

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
